

SMART, SUSTAINABLE
NANO-FORMULATED SOLUTIONS

PURE GUARD

A light-activated nano-formulation that automatically helps keep surfaces clean while improving surrounding air quality.

BREAKS DOWN SURFACE GROWTH

Pure Guard absorbs surrounding UV light to create a chemical reaction that works to break down organic growth and dirt build-up on horizontal and vertical surfaces.

IMPROVES SURROUNDING AIR

Pure Guard decomposes VOCs, car exhaust fumes, and nitrogen oxides (NOx). As a result, surrounding air quality is improved! In terms of NOx pollutants, every 250 sq. ft. of Pure Guard-treated surface has the same cleaning power as 1 adult tree!

EASY TO APPLY AND CLEAN

Without the need for primers, Pure Guard is best applied to a clean, dry surface using a low-pressure pump-spray system without dilution. Cleaning is simple! Pure Guard creates a super-hydrophilic barrier, meaning surface stains wash off easily!

CHOOSE THE ARMUS COMBO

Pure Guard works best as a topcoat with either HYDRO GUARD or REPAIR GUARD as a protective base. Hydro Guard / Repair Guard protect or reinforce the base substrate, and together with Pure Guard's cleaning power, you've got full-system protection.

FEATURES

-  **RETAINS BREATHABILITY**
-  **DECOMPOSES POLLUTANTS**
-  **MOLD & ALGAE PROTECTION**
-  **LIGHT-ACTIVATED SELF-CLEANER**
-  **KEEPS NATURAL APPEARANCE**
-  **SAVES ON CLEANING COSTS**

SUBSTRATES

-  **CONCRETE**
-  **BRICK**
-  **LIMESTONE**
-  **CEMENT**
-  **GRANITE**
-  **STONE**

ESTIMATED COVERAGE

- **1 GALLON** ~325-400 SQ. FT. (30-37.2 SQUARE METERS)

PURE GUARD

SEE WHY THE PROS CHOOSE PURE GUARD.
CLEANER SURFACES.
CLEANER AIR QUALITY.
LESS MAINTENANCE.
BETTER FOR THE ENVIRONMENT.

APPLICATION & POST-APPLICATION CARE

With the proper care, Pure Guard can provide long-term protection for your exterior surfaces. Application is simple and you can even do it yourself.

We recommend pairing Pure Guard with Hydro Guard or Repair Guard to provide a water-repellant base coat. These formulas work on the same substrates and can offer complete protection on your exterior surfaces.

Over time, additional coats of Pure Guard may be required. All applications of Pure Guard should be done on a clean, dry surface. This may require a professional power washing. See the Application Guide on our website for more details and instructions.

Questions about application, your substrate, or post-application care? We've got you covered and we're here to help! Email us for more info.

PURE GUARD CAN HELP PREVENT PROBLEMS!

MOLD & ORGANIC GROWTH

Pure Guard uses titanium-dioxide to create a self-cleaning barrier on surfaces, automatically breaking down mold, organic growth & dirt build-up!

WATER-DAMAGED WALLS

Pure Guard works best when used as a topcoat in combination with Hydro Guard / Repair Guard, which prevent water-ingress and stabilize materials, keeping building surfaces protected and cleaner longer.

HIGH, FREQUENT CLEANING COSTS

Frequent professional cleaning costs can add up quickly. Constant high water pressure can also damage surface substrates. With Pure Guard, reducing your cleaning frequency saves you money, and protects your building surface.

YOU'VE GOT TO SEE IT TO BELIEVE IT
